

Project 2

Rental Home Prediction

Leo Liu

Objective

- Evaluate a property

- Budget your rental

Data Source

Seattle, WA

Provided by Apartments.com:

Apartment for Rent
\$1,488+ /month

0 - 2 bd 1 - 2 ba 461+ sqft
Harbor Steps 1221 1st Ave, Seattle, WA 98101

Provided by Apartments.com:

Apartment for Rent
\$1,750+ /month

0 - 2 bd 1 - 2 ba 490+ sqft
Leeward 1305 Dexter Ave N, Seattle, WA 98109

Provided by Apartments.com:

Apartment for Rent
\$1,540+ /month

1 - 2 bd 1 - 2 ba 437+ sqft
Assembly118 4200 S Othello St, Seattle, WA 98118

Provided by Apartments.com:

Apartment for Rent
\$1,895+ /month

Provided by Apartments.com:

Apartment for Rent
\$1,693+ /month

Process

1

Web Scrapping

- Get URLs
- Iterate over pages
- Scrap each single page

2

Data Cleaning

- Account for only popular community and unit features

3

Modeling

- MVP
- Feature Screening
- Polynomial Features
- Variable Transformation

4

Training & Testing

- Check overfitting

Model

- Features:

Bedrooms

Sqft

Schools

Community Features

Median Rental Price

Bathrooms

YearBulit

Average School Rating

Unit Features

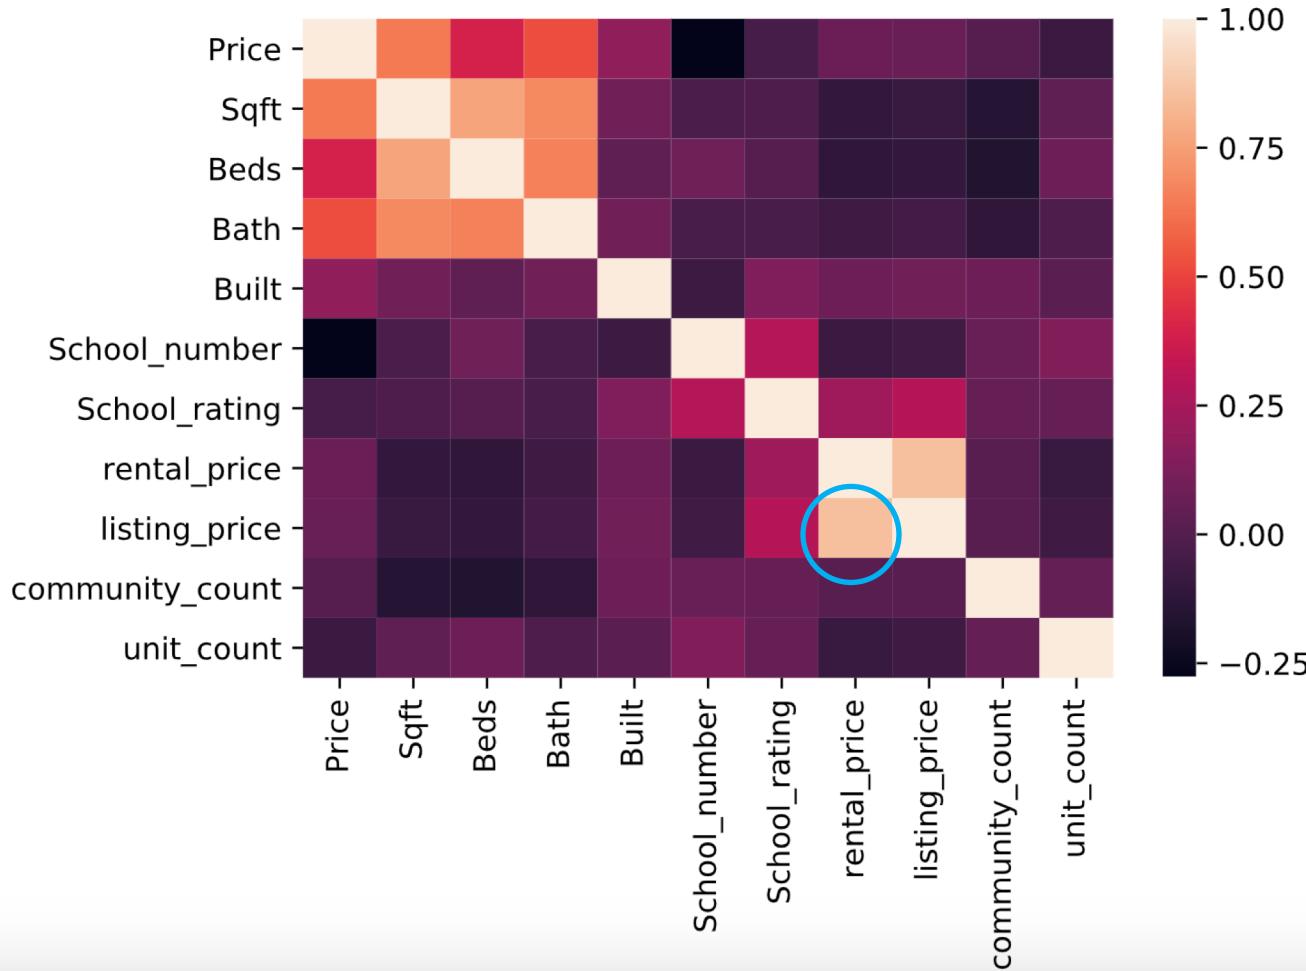

Median Listing Price

- Responses:

Rental Price

Model

Check heteroskedasticity

Residual plot and Normal Q-Q plot of 2-degree polynomial feature regression model

Model

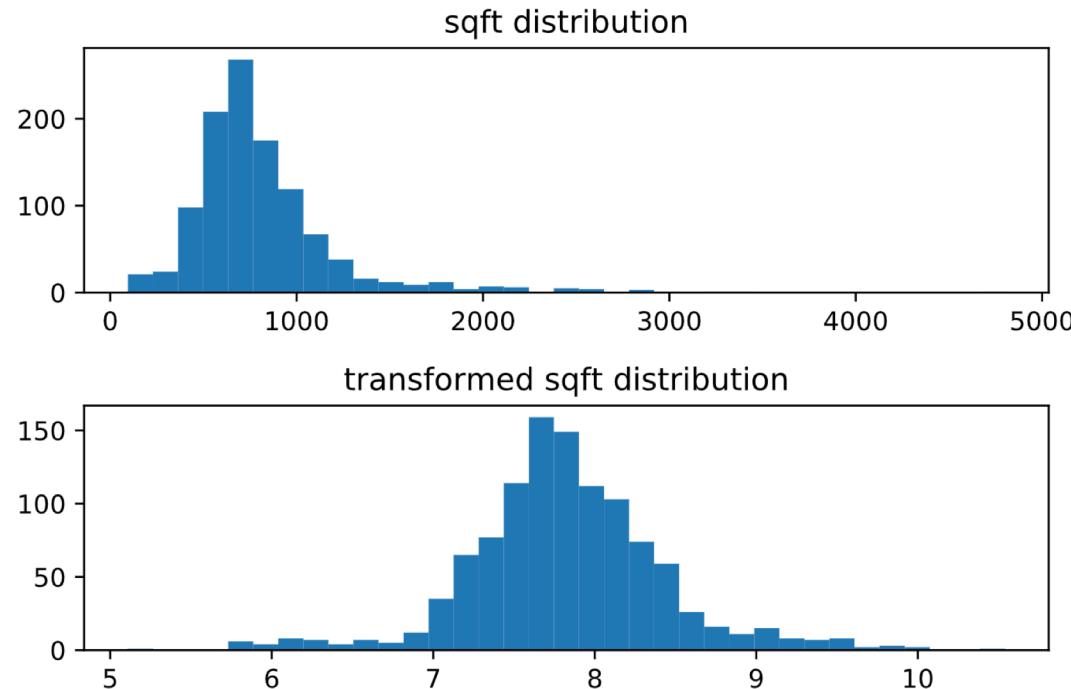

Check heteroskedasticity

Distribution of y and $\log(y)$

Model

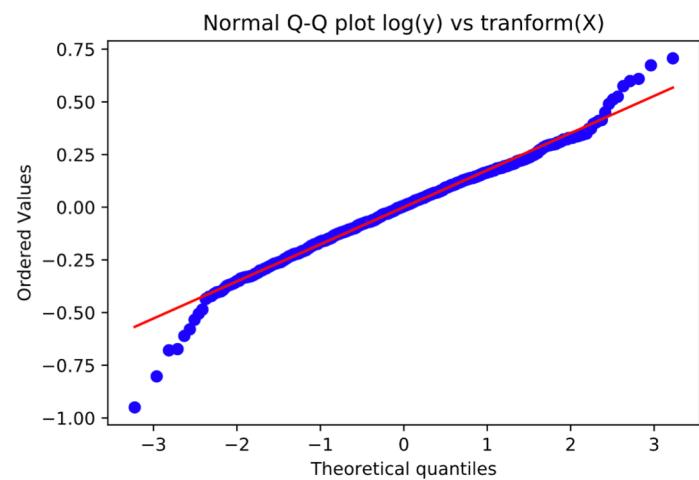

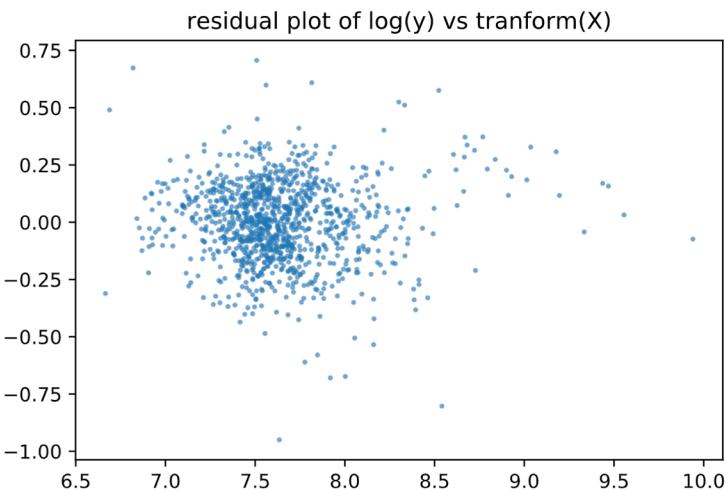

Check heteroskedasticity

Distribution of Sqft and Boxcox transformed Sqft

Model

Check heteroskedasticity

Residual plot and Normal Q-Q plot of 2-degree polynomial feature regression model with transformed variables

Train and Test

Cross Validation on Training Data

- R-Squared = 0.730 +/- 0.033
- Mean Squared Error = 0.041 +/- 0.010

Check Overfitting

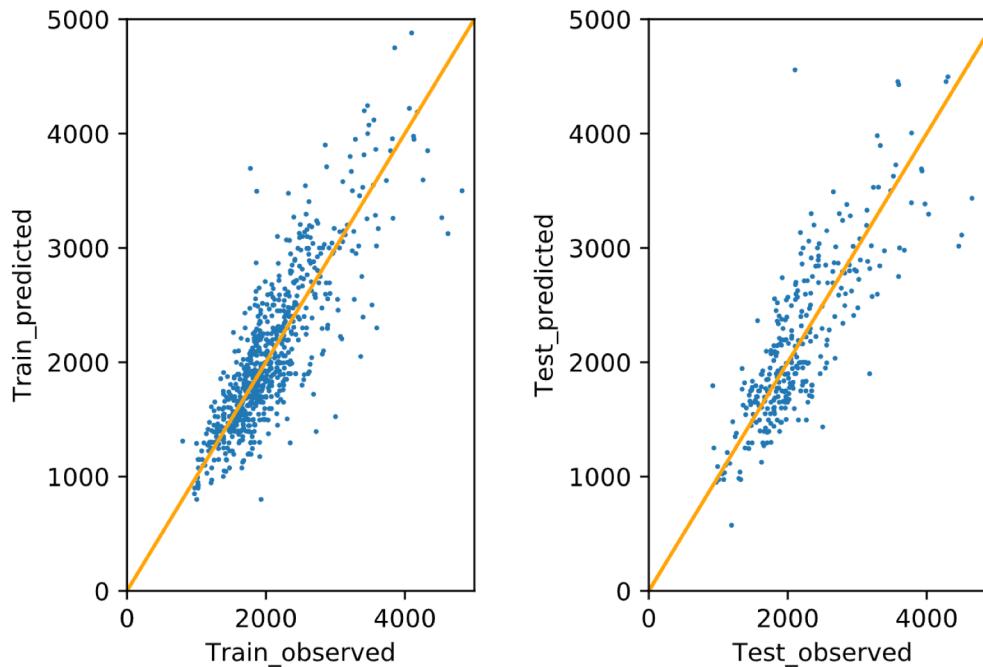

- R-Squared(Train) = 0.791
- R-Squared(Test) = 0.780
- Mean Squared Error(Train) = 0.031
- Mean Squared Error(Test) = 0.037

$$e^{\sqrt{0.037}} = 1.212$$

$$e^{\sqrt{0.031}} = 1.192$$

So the final deviation between train and test is about $1.212/1.192 - 1 \approx 1.6\%$

Train and Test

Train & Test Prediction vs. Observation

Future Work

- Increase dataset
- Incorporate more features
- Create customized models for different property types

Thank You!
